

C32 TCU Removal Instructions

The TCU is located on the passenger side of the car, inside the cabin.

Pull the carpet and foam padding back from the passenger floorboard, up near the console. You will need a 10mm socket wrench with an extension. There are three bolts that hold the metal plate in place.

Once the bolts are removed, pull the plate back and up. The TCU is located on the back of the plate. You will need an 8mm socket to remove the two bolts holding the TCU in place. Then pull the two connectors out of the TCU.
